Branching options

Description

PaySense is a student project: a website that helps a student think about whether a "buy now, pay later" (BNPL) purchase is a good idea. This session is a user acceptance test. Its purpose is to evaluate how usable the PaySense dashboard is, how useful you find it, and how well its explainable AI features (the parts that show why it gives the answer it does) make sense to you. This is a test of the website, not of you. There are no right or wrong answers.

Everything in the session is made up. Please do not enter any of your own bank, e-wallet or BNPL details anywhere.

Taking part is voluntary. You can skip any question and stop at any time, and nothing happens if you do. Your answers are kept under your code (for example P03), never your name, and are used only in this project's report, together with other people's answers. The report may quote a short comment without anything that identifies you. To have your answers removed, tell the project author your code before the report is written.

1. [A-CODE] Your code *

(it is at the top of your page, for example P03)

2. [A-CONSENT] I have read the above and I am happy to take part. *

- ◯ Yes

3. [A-SCEN] Which item is **Purchase 1** on your page? *

Choose 1 only

- ◯ Wireless headphones — Go to 2. Wireless headphones
- ◯ Laptop repair — Go to 3. Laptop repair
- ◯ Shoes — Go to 4. Shoes

Wireless headphones

You get RM 1,000 a month (allowance and part-time work). Rent, food and transport come to about RM 850. You already pay RM 150 a month on another BNPL plan. You want headphones priced at RM 600 and can pay on SPayLater in 3 monthly instalments, the first due next month.

4. [V1-pre] Which would you do? *

- ◯ A. Buy them on SPayLater in 3 instalments, as offered
- ◯ B. Buy them but spread over 6 instalments
- ◯ C. Buy a cheaper pair at about half the price
- ◯ D. Wait a month and decide then
- ◯ E. Do not buy them

5. [V1-pre-conf] How sure are you of that choice? *

1 = Not at all sure ; 5 = Completely sure

Laptop repair

Your income varies: RM 400 in a quiet month and RM 1,600 in a busy one, about RM 1,000 on average. Your fixed costs are about RM 700 a month. Your laptop needs a RM 1,200 repair. Atome offers 4 payments, the first at checkout.

6. [V2-pre] Which would you do? *

- ◯ A. Repair it on Atome in 4 payments, as offered
- ◯ B. Repair it but ask for a longer plan elsewhere
- ◯ C. Choose a cheaper repair or a second-hand part
- ◯ D. Borrow a laptop for a month and decide then
- ◯ E. Do not repair it

7. [V2-pre-conf] How sure are you of that choice? *

1 = Not at all sure ; 5 = Completely sure

Shoes

You live on RM 700 a month and spend nearly all of it on rent, food and transport. A pair of shoes you like costs RM 250. TikTok PayLater lets you pay in 2 monthly instalments, the first due next month.

8. [V3-pre] Which would you do? *

- ◯ A. Buy them on TikTok PayLater in 2 instalments, as offered
- ◯ B. Buy them but spread over 4 instalments
- ◯ C. Buy cheaper shoes
- ◯ D. Wait until you have saved part of the price
- ◯ E. Do not buy them

9. [V3-pre-conf] How sure are you of that choice? *

1 = Not at all sure ; 5 = Completely sure
